

Power by People

Enphase Energy is a global energy technology company and the world's leading supplier of microinverter-based solar and battery systems. Founded and headquartered in California, Enphase is revolutionizing how solar power is made, used, saved, and sold by providing homeowners with home energy systems.

2006

the year Enphase was founded

3,011

employees and key contributors across our global offices¹

8,000+

installation companies worldwide¹

Approximately

3.3 million

systems² deployed in more than 145 countries

Approximately

2.0 million

systems² deployed in the U.S.

Approximately

63 million

microinverters shipped¹

Approximately

21GW

cumulative shipments of microinverters¹

917.50 MWh

of energy storage systems shipped¹

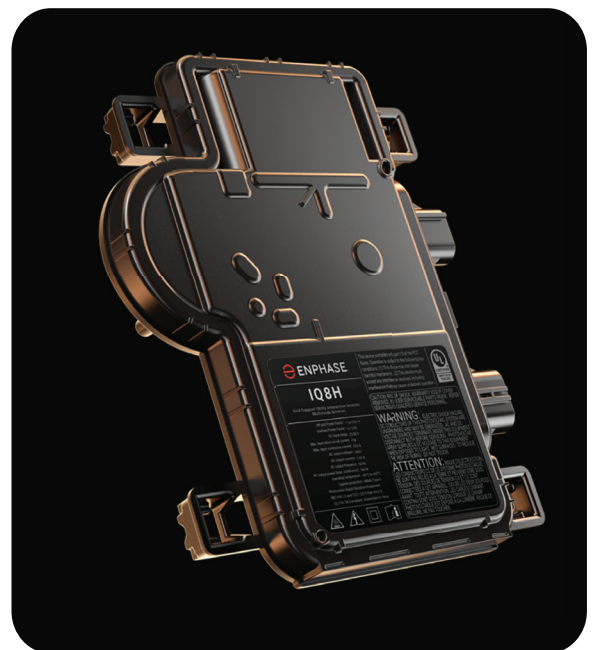

45 million

MTCO₂e prevented from entering the atmosphere, enough to power 5.7 million homes for one year²

5.1 billion

gallons of gasoline not consumed²

¹ As of March 31, 2023

² Estimate based on Enphase managed systems data as of March 31, 2023 grossed up for non-managed systems based on cumulative sales records; CO₂e calculations based on EPA GHG calculator
